Projects

Crypto Currency Tracker

. This is a project I made using api's it tracks all of the major cryptocurrencies available on the market this is a Realtime price viewer made using html, CSS and JavaScript

Foodies

. This is a great UI/UX project based on food delivering application it contains more than 5 pages and made with vanilla technologies like html, CSS and JavaScript

Demand-Services

. This is a single application for all of the work a single platform for every services contains more than 50+ files in the project this project is made with vanilla technologies like HTML, CSS and JavaScript.

Amazon clone

- Created a user-friendly web application mimicking Amazon's layout and design.
- . Developed user authentication, allowing users to sign up, log in and a shopping cart feature enabling users to add and remove items in their cart.
- Employed Stripe API for handling payment transactions and Firebase for database management.

Interests

- . Cricket
- . Badminton
- . Music
